

User Story 1 Test Data: Username: "standard_user", Password: "secret_sauce" Assigned to: Jovana Janošević Date executed: TBA						
TCs_1Login Functionality						
Prerequisite: The user has a valid username & email to sign up with, and the link to navigate to the login page: https://www.saucedemo.com/v1/index.html						
Step	Action	Expected Result	Status	Actual Result	Priority	Note
1	Validate login with correct credentials					
1.1	Navigate to the login page.	User login is successful. User is redirected to the homepage.	Pass	User login is successful. User is redirected to the homepage.	High	Improvement suggestion: Login button should be enabled for click only after entering username and password.
1.2	Enter a valid username (e.g. "standard_user")					
1.3	Enter a valid password (e.g. "secret_sauce")					
1.4	Click the "Login" button.					
2	Validate unsuccessful login with invalid username					
2.1	Navigate to the login page.	User login is not successful. An error message is displayed indicating username is incorrect. Username field should be highlighted.	Fail	Login is not successful. The error message is displayed indicating that 'username <u>and</u> password' do not match any user in this service. Username field is not highlighted.	High	The error message should indicate that only username is incorrect, or to change the wording of the message to 'username OR password do not match any user'
2.2	Enter an invalid username (e.g. "sloppy_user")					
2.3	Enter a valid password (e.g. "secret_sauce")					
2.4	Click the "Login" button.					
3	Validate unsuccessful login with invalid password					
3.1	Navigate to the login page.	User login is not successful. An error message is displayed indicating incorrect password credentials. Button "forgotten password?" should appear.	Fail	Login is not successful. The error message is displayed indicating that 'username <u>and</u> password' do not match any user in this service. Button "forgotten password?" does not appear.	High	The error message should indicate that only password is incorrect, or to change the wording of the message to 'username OR password do not match any user'
3.2	Enter a valid username (e.g. "standard_user")					
3.3	Enter an invalid password (e.g. "santa_sauce")					
3.4	Click the "Login" button.					
4	Validate unsuccessful login with invalid username and password					
4.1	Navigate to the login page.	User login is not successful. An error message is displayed indicating incorrect username and password credentials. Username field should be highlighted. Button "forgotten password?" should appear.	Fail	Login is not successful. The error message is displayed indicating that 'username and password' do not match any user in this service. Button "forgotten password?" does not appear.	High	Improvement suggestion: Input fields should have validation for length. It should have min and max lenght.
4.2	Enter an invalid username (e.g. "standard_user")					
4.3	Enter an invalid password (e.g. "santa_sauce")					
4.4	Click the "Login" button.					
5	Validate unsuccessful login with a blank username field					
5.1	Navigate to the login page.	User login is not successful. An error message appears notifying the user that the username field cannot be left empty. Username field should be highlighted.	Pass	Login is not successful. The error message is displayed indicating that the username is required.	High	
5.2	Leave username field empty					
5.3	Enter a valid password (e.g. "secret_sauce")					
5.4	Click the "Login" button.					
6	Validate unsuccessful login with a blank password field					
6.1	Navigate to the login page.	User login is not successful. An error message appears notifying the user that the password field cannot be left empty.	Pass	Login is not successful. The error message is displayed indicating that the password is required.	High	
6.2	Leave username field empty					
6.3	Enter a valid password (e.g. "secret_sauce")					
6.4	Click the "Login" button.					
7	Validate unsuccessful login with a blank username and password field					
7.1	Navigate to the login page.	User login is not successful. An error message appears notifying the user that the password field cannot be left empty.	Pass	Login is not successful. The error message is displayed indicating that the password is required.	High	
7.2	Leave username field empty					
7.3	Enter a valid password (e.g. "secret_sauce")					
7.4	Click the "Login" button.					
8	Validate unsuccessful login with a correct username, but different case. (e.g. "PROBLEM_USER")		Ready to test			
9	Validate unsuccessful login with a correct password, but different case. (e.g. "SECRET_SAUCE")		Ready to test			
10	Validate unsuccessful login with correct username and password, but different case.		Ready to test			
11	Validate unsuccessful login with additional space added after entering a correct username		Ready to test			
12	Validate unsuccessful login with additional space added after entering a correct password		Ready to test			
13	Validate unsuccessful login with additional space added after entering a correct username and password		Ready to test			
BRs_1Login Functionality - Bug Report						
Prerequisite: The user has a valid username & email to sign up with, and the link to navigate to the login page: https://www.saucedemo.com/v1/index.html						
Step	Action	Expected Result	Severity	Actual Result	Priority	Note
1	Confusing error message upon validating login with incorrect username					
1.1	Navigate to the login page.	Upon validating login with incorrect username the error message is displayed indicating that the username does not match any user in this service.	Major	Upon validating login with incorrect username the error message is displayed indicating that both 'username and password' do not match any user in this service.	High	Improvement suggestion: the username field should be highlighted when the error message appears.
1.2	Enter an invalid username (e.g. "sloppy_user")					
1.3	Enter a valid password (e.g. "secret_sauce")					
1.4	Click the "Login" button and observe.					
2	Confusing error message upon validating login with incorrect password					
2.1	Navigate to the login page.	Upon validating login with incorrect password the error message is displayed indicating that the password is incorrect.	Major	Upon validating login with incorrect username the error message is displayed indicating that both 'username and password' do not match any user in this service.	High	
2.2	Enter a valid username (e.g. "standard_user")					
2.3	Enter an invalid password (e.g. "santa_sauce")					
2.4	Click the "Login" button and observe.					
3	"Forgotten password" message completely missing from the page upon validating login with incorrect password					
3.1	Navigate to the login page.	Upon validating login with incorrect username the error message is displayed indicating that the password is incorrect, and below this, a "forgotten password" button, so the user can have an option to change the existing password.	Minor	Upon validating login with incorrect username the error message is displayed indicating that both 'username and password' do not match any user in this service, and the "forgotten password" button is not present.	Medium	mprovement suggestion: Button "forgotten password?" should be present below the password field.
3.2	Enter a valid username (e.g. "standard_user")					
3.3	Enter an invalid password (e.g. "santa_sauce")					
3.4	Click the "Login" button and observe.
